

## Chief Technology Officer – Manila, Philippines

mClinica is a fast-growing, impact-driven technology organization whose mission is to build digital networks of pharmacies, physicians, and patients to improve market efficiencies and health outcomes for hundreds of millions of people across Asia. As a social enterprise, we work with leading pharmaceutical companies, government agencies and NGOs including USAID, UKAID, Omidyar Network, and Stanford University among others.

mClinica is hiring a **Chief Technology Officer** to lead our growing technical team into its next phase. We are looking for someone with engineering leadership experience who enjoys thinking deeply about technology, teams, and scale. You are a builder, a leader, and a true team player who is excited about the opportunity to help lead this startup into the next stage of growth.

You're a talented engineer, perhaps you even like jumping in on feature development, because you expect to build an exceptional product that people truly care about. Ideally, although not required, you are passionate about using digital technology and data sharing to solve complex global health problems.

### Your tasks and responsibilities:

- Work directly with the senior management team to set the technical vision and roadmap of the company
- Lead, manage, and scale the tech and product teams; develop and train talent to ensure optimal team performance
- Translate the product vision into features and roadmaps for the product team; support the Product team on a technical and design
- Plan and adapt the technology stack
- Work with cross functional teams to shape and manage app and web design strategy from wireframes to publishing
- Ensure scalability, security and stability of the platforms
- Direct and lead your team in the right direction, but when it is necessary, you can perform tasks yourself (programming, provide IT solutions and more)
- Oversee and maintain the application architecture

### Your Profile

- Management experience at technical companies and/or startups
- Record of success in technology leadership
- Deep and repeated experience building, launching, and enhancing highly scalable web and mobile applications
- Ability to plan, execute, and deliver a product roadmap on time; success in translating ideas into functionality
- Proven track record of managing a team of developers
- Strong QA/ testing background
- Comfortable communicating to both technical and non-technical teammates

### Skills:

We are looking for someone with experience in the following technologies:

- Excellent understanding of JavaScript (ES6)

- Solid experience with Node.js, advanced REST API Standards, React JS, Express JS Framework, and Geographic API Technologies
- Strong experience in creating and managing large database building
- Experience in full stack development of highly scalable mobile applications
- Strong experience with AWS, and MySQL, and Microsoft Azure

#### **What You Can Expect from Us**

- Significant career growth opportunities in a fast-growing startup in southeast Asia
- A collaborative and team-oriented approach with a focus on exceeding personal and company-wide goals
- Competitive compensation
- Opportunities for international travel
- Fun & casual, flat hierarchical working environment on a diverse, international team
- Starting date: Immediate

#### **Apply**

If you are interested in this position and would like to become part of the mClinica team, please send your resume to [Lindsay@mclinica.com](mailto:Lindsay@mclinica.com) (Subject: CTO).
