

## Product Manager – Manila based

You are a collaborative visionary that is passionate about using mobile technology to tackle global problems? You can translate a business perspective into actionable items for the engineering team?

At mClinica we value talented professionals with a global mindset that take initiative and drive change. In turn we reward them with significant responsibility and the ability to directly impact our business. We are now looking for an experienced and highly motivated **Product Manager** who can bring our multi country digital platforms to the next level and change the health outcomes of hundreds of millions of patients across Southeast Asia.

### Responsibilities:

- Write user stories, acceptance criteria, grooming and prioritizing backlog.
- Manage product roadmap and translate high level strategies into manageable stories and product backlog.
- Support the development teams during each release cycle to clarify requirements, make priority calls, review test plans and determine a release schedule.
- Work closely with Business Stakeholders to create and maintain a product backlog according to business value and ROI.
- Balance commercial needs against technical requirements and capabilities.
- Understand fundamentals of evolutionary change & iterative development.
- Capable of managing both up and down, setting realistic expectations at executive level.

### Qualifications (required):

- Energetic self-starter and team player, comfortable with a demonstrated ability to achieve strategic goals in a rapidly evolving startup environment.
- Excellent problem solving, organizational and analytical skills.
- Experience designing and building great user experiences on both web and mobile.
- 3 - 5 years experience in a reputable technology company, incl. 2+ years as an Agile Product Manager, Technical Product Manager or Product Manager.
- Experience with software development life cycle (SDLC).
- Ability to balance conflicting priorities – you might be required to work on multiple projects simultaneously.
- Bachelors degree in a relevant field and/or equivalent experience.

**Skills (preferred):**

- Experience with A/B and multi-variate testing.
- A background in user-centric design.
- Experience building mobile applications and marketplaces.
- Ability to negotiate and challenge when required.
- Experience with healthcare technology products.
- Southeast Asia regional experience.

**Benefits:**

- Opportunity to work with bleeding edge technologies (we decide what we use).
- Competitive salary.
- Career growth (we reward performance).
- Fun working environment as part of a high performing global team.

**Start date:** As soon as possible.

We work hard, we work smart, we are very passionate about what we do, and we like to have fun. Interested? Send your resume to [careers@mclinica.com](mailto:careers@mclinica.com) (Subject: Product Manager)
