

## DevOps Engineer– Manila based

Do you have a high level of technical curiosity and solid problem solving skills? Are you comfortable working in uncharted territory and want to help us advance healthcare for hundreds of millions of patients across Southeast Asia? mClinica is a fast growing impact-driven health tech company. We work with pharmaceutical companies, governments and NGOs by providing mobile and web technology platforms to tackle the complex challenges of the healthcare industry.

At mClinica we value people that take initiative and reward them with significant responsibility and the ability to directly impact our business globally. We're now looking for a talented and experienced **DevOps Engineer** to join our Global Tech Team in Manila where you'll be working in performant Agile/Scrum environment collaborating with other developers to deliver high quality products to our customers.

### Your role:

- Continuously improve platform security.
- Work closely with other developers to ensure that continuous integration, infrastructure as code and test driven development are proactively managed and implemented as part of best practice
- Improve service reliability through root cause analysis, blameless post-mortems, and using code to prevent or respond to problem recurrence.
- Apply best practices and patterns of the latest trends in the DevOps (Load Balancing, Monitoring, Zero Downtime, Microservices).
- Find ways to reduce cost and optimize the performance.

### Qualifications (required):

- Comfortable with Azure or AWS Cloud (> 2 years experience)
- A strong desire to remain current on emerging digital technologies.
- Experience in full Software Development Life Cycle (SDLC) and Agile methodologies
- Minimum 3 years solid experience with Linux and Open Source administration and configuration: Nginx, MySQL, Redis, Elastic (ELK).
- Previous exposure to and experience with Continuous Integration tools such as Jenkins, Bamboo, VSTS.
- 3 + years experience with monitoring and alerting tools.
- 1 + years experience with Docker, Kubernetes is a plus.
- Working experience on environment and server provisioning tools like: Chef, Puppet, Ansible, Terraforms, etc.

**Skills (preferred):**

- Experience with VSTS.
- Microsoft Azure Certification.
- Experience managing Kubernetes clusters.
- Experience with healthcare technology products.
- Southeast Asia regional experience.

**Benefits:**

- Opportunity to directly impact cutting edge multi country products in close collaboration with company leadership team.
- Competitive salary (we reward performance).
- Career growth (we give you direct responsibilities).
- Free flowing coffee, lunch provided.
- Fun working environment as part of a high performing global team.

**Start date:** As soon as possible.

We work hard, we work smart, we are very passionate about what we do, and we like to have fun. Interested? Send your resume to [careers@mclinica.com](mailto:careers@mclinica.com) (Subject: DevOps Engineer)
