Full-stack Node.js Developer – Manila based

Do you have a high level of technical curiosity and solid problem solving skills? Are you comfortable working in unchartered territory, and want to help us advance healthcare for hundreds of millions of patients across Southeast Asia? mClinica is a fast growing impact-driven health tech startup focused on connecting pharmacies to transform global health. We work with pharmaceutical companies, governments and NGOs by providing mobile and web technology platforms to tackle the complex challenges of the healthcare industry.

At mClinica we value people that take initiative and reward them with significant responsibility and the ability to directly impact our business globally. We're now looking for talented and passionate **Full-stack Developers** to join our Global Tech Team in Manila where you'll be working in performant Agile/Scrum environment collaborating with other developers to deliver high quality products to our customers.

Your role:

- Develop coding standards, methodology and repeatable processes.
- Provide technical leadership at project level; mentor and teach junior developers.
- Ensure code and design quality through the execution of test plans.
- Collaborate with engineering team to design and launch new features.
- Use best practices and patterns to deliver high quality secure, scalable, performant and maintainable code.

Qualifications (required):

- 2+ years of experience building Microservices, preferably with Node.js in Agile/Scrum environment.
- 1+ years of experience with deploying Node.js based solutions into production (e.g. Express, React, Babel, Sequelize).
- 2+ years experience with modern frontend development (e.g. React, Redux).
- 3+ years of experience with relational databases and/or NoSQL databases (e.g. MySQL, Redis, MongoDB, ElasticSearch).
- Minimum Bachelor's degree in Computer Science or Software Engineering or at least 4 years of software development experience.
- Self driven with a strong desire to remain current on emerging digital technologies.

Skills (preferred):

- Passionate about Node.js performance optimization.
- Experience working as a full-stack developer switching seamlessly between server-side and front-end code.
- Experience in CI/CD tools (e.g. Jenkins, Bamboo, VSTS, etc).
- Web development experience (e.g. React, Redux, HTML, CSS).
- Experience with Twelve-Factor App methodology and microservice architecture.
- Experience with cloud based API Management / Gateway offerings (e.g. AWS API Gateway, Azure API Gateway, Apigee).
- Experience with Docker & Kubernetes.

Benefits:

- Opportunity to work with bleeding edge technologies (we decide what we use).
- Competitive salary (we reward performance)
- Career growth along with direct responsibilities.
- Dedicated training budget.
- Free flowing coffee & lunch provided.
- Casual working environment as part of an international team.

Start date: As soon as possible.

We work hard, we work smart, we are very passionate about what we do, and we like to have fun. Interested? Send your resume to careers@mclinica.com (Subject: Full-stack Developer)
