

Full-Stack Developer – Taguig, Philippines

mClinica is a fast-growing impact-driven health tech startup focused on connecting pharmacies to transform global health. We work with pharmaceutical companies, governments and NGOs by providing mobile and web technology platforms to tackle the complex challenges of the healthcare industry.

At mClinica we value people that take initiative and reward them with significant responsibility and the ability to directly impact our business globally. We work hard, we work smart, we are very passionate about what we do, and we like to have fun. Interested? We're now looking for talented and passionate **Full-Stack Developers** to join our Global Tech Team in Manila where you'll be collaborating with other developers to deliver high quality products to our customers.

Your Role:

- Develop coding standards, methodology and repeatable processes.
- Provide technical leadership at a project level, mentor and teach junior developers.
- Ensure code and design quality through the execution of test plans.
- Collaborate with engineering team to design and launch new features.
- Use best practices and patterns to deliver high quality secure, scalable, performant and maintainable code.

Your Qualification:

- Bachelor's degree in Computer Science or equivalent
- At least 2 years experience building Microservices, with Node.js/JavaScript in Agile/Scrum environment.
- At least 1 year experience with deploying Node.js based solutions into production (e.g. Express, React, Babel, Sequelize).
- At least 2 years experience with modern front-end development (e.g. React, Redux).
- At least 3 years of experience with relational databases and/or NoSQL databases (e.g. MySQL, Redis, MongoDB, Elasticsearch).
- Experience with other programming languages like PHP, Java, Python
- Self-driven with a strong desire to remain current on emerging digital technologies.
- Passionate about Node.js performance optimization.
- Experience working as a full-stack developer switching seamlessly between server-side and front-end code.
- Experience in CI/CD tools (e.g. Jenkins, Bamboo, VSTS, etc).
- Web development experience (e.g. React, Redux, HTML, CSS).
- Experience with Twelve-Factor App methodology and microservice architecture.
- Experience with cloud based API Management / Gateway offerings (e.g. AWS API Gateway, Azure API Gateway, Apigee, etc.)
- Experience with Docker and Kubernetes

What You Can Expect from Us:

- **Significant career growth opportunities** in a fast-growing business
- **Competitive compensation** package
- Opportunities for **international travel**.
- **Challenging and diverse assignments**
- **Fun & casual working environment** in an international team.

Apply
