

IT Business Analyst – Taguig, Philippines

mClinica is a fast-growing impact-driven healthcare technology company, focused on advancing healthcare for hundreds of millions of people across Asia. We deliver Healthcare Market Access and Analytics services to Pharmaceutical Companies, NGOs and Public-Sector Institutions across 6 countries in Southeast Asia.

At mClinica, people who take initiative and ownership are rewarded with significant responsibility and opportunity to directly impact the business globally. We are now looking for an experienced and highly motivated **IT Business Analyst** who can bring our multi country digital platforms to the next level and change the health outcomes of hundreds of millions of patients across Southeast Asia.

Your Role:

- Gathering, analysing and documenting solution requirements using Business Analysis techniques in an agile environment to capture both functional and technical requirements
- Facilitating workshops to gather requirements of various stakeholders and lead follow-up activities
- Working with product managers and business partners to ensure that captured requirements are measurable, testable and have an associated business benefit
- Working effectively with UX designers, data analysts, developers and test teams to ensure requirements are interpreted correctly
- Providing support to both internal and external teams during the various test execution phases
- Operating within and adhering to the Scrum methodology
- Change control related tasks including analysis of new defects or requests from the business
- Responding effectively in a dynamic project environment and working with tight deadlines
- Develop functional design deliverables, which translate business requirements into effective solutions

Your Qualification:

- Experience using Python for statistical analysis.
- Minimum of 2+ years' experience as an IT Business Analyst
- Proven delivery track record in business type initiatives such as business requirements definition, continuous process improvement & cost reduction initiatives
- Hands-on experience with software development life cycle (SDLC) preferably Agile development methodology
- Excellent written and verbal interpersonal skills
- Keen attention to details and adherence to processes
- With affinity for structure, documentation and planning to scheduling
- Building positive relationship and able to communicate and influence the team
- A self-starter with an enthusiastic approach in handling risks, dependencies and critical issues
- Highly skilled in MS Office, Confluence, Jira, diagramming tools
- Ability to interpret and analyse existing reporting or data with ability to drive data analysis into conclusions and actions
- Bachelors degree in a relevant field and/or equivalent experience.
- Experience with healthcare technology products is a plus

What You Can Expect from Us:

- **Significant career growth opportunities** in a fast-growing business
- **Competitive compensation** package
- Opportunities for **international travel**.
- **Challenging and diverse assignments**
- **Fun & casual working environment** in an international team.
