

Product Manager – Taguig, Philippines

mClinica is a fast-growing impact-driven healthcare technology company, focused on advancing healthcare for hundreds of millions of people across Asia. We deliver Healthcare Market Access and Analytics services to Pharmaceutical Companies, NGOs and Public-Sector Institutions across 6 countries in Southeast Asia.

At mClinica, people who take initiative and ownership are rewarded with significant responsibility and opportunity to directly impact the business globally. We are now looking for an experienced and highly motivated **Product Manager** who can bring our multi country digital platforms to the next level and change the health outcomes of hundreds of millions of patients across Southeast Asia.

Your Role:

- Write user stories, acceptance criteria, grooming and prioritizing backlog
- Manage product roadmap and translate high level strategies into manageable stories and product backlog
- Support the development teams during each release cycle to clarify requirements, make priority calls, review test plans and determine a release schedule
- Work closely with Business Stakeholders to create and maintain a product backlog according to business value and ROI
- Balance commercial needs against technical requirements and capabilities
- Understand fundamentals of evolutionary change & iterative development
- Capable of managing stakeholders and setting realistic expectations at executive level
- Having an extremely hands-on attitude – must be willing to dive deep into the inner works of mClinica's products and platform and become a product expert in it
- Maximize efficiency in a startup environment where the process is fluid and solutions are bread and butter

Your Qualification:

- Bachelors degree in a relevant field and/or equivalent experience.
- 5 years or more experience in a reputable technology company, incl. 2+ years as a Product Manager or Technical Product Manager.
- With experience working in Business to Client environment
- Experience with software development life cycle (SDLC).
- Preferably with Agile & Scrum experience with the ability to create and analyze multi-variate testing
- Experience building mobile applications and marketplaces is an asset
- Experience designing and building great user experiences on both web and mobile.
- Background in user-centric design is a plus
- Excellent problem solving, organizational and analytical skills.
- Ability to negotiate and challenge when required.
- Experience with pharma technology products is a plus
- With at least experience in handling products on a supervisory level

What You Can Expect from Us:

- **Significant career growth opportunities** in a fast-growing business
- **Competitive compensation** package
- Opportunities for **international travel**.
- **Challenging and diverse assignments**
- **Fun & casual working environment** in an international team.
