

## UI/UX Designer – Taguig, Philippines

You have an exceptional eye for clean design and can translate insights from user studies into actions? You thrive when helping to define the requirements and can work hand in hand with the product team to build elegant and intuitive products that advance healthcare for hundreds of millions of people across Asia?

mClinica is a fast-growing impact-driven health tech technology company, focused on connecting pharmacies and transforming global health. We work with pharmaceutical companies, governments and NGOs by providing mobile and web technology platforms to tackle the complex challenges of the healthcare industry. We are looking for a talented and experienced **UI / UX Designer**, who can bring our products to the next level.

### Your Role:

- Create highly desirable, intuitive interfaces that place the user at the center.
- Convert complex business requirements into a living style guide.
- Take features from concept and wireframe stage through to mock-ups to final interfaces.
- Collaborate closely with stakeholders to deliver best-in-class consumer facing user experiences.
- Contribute design concepts for mockups, wireframes and prototypes.
- Prototype and rollout high quality experiences for content modules, pages and flows for responsive web and mobile apps.
- Ability to work across teams, in-house and offshore developers as well as the Product Manager and product team, to ensure the design is aligned with the business/user needs and implemented as designed.
- Balance the urgency of business priorities with the importance of product consistency and interface usability.

### Your Qualification:

- Bachelor's degree in Computer Science or equivalent
- 3 -5 years experience as a user experience designer, interaction designer, information architect, or similar UX-related role for web.
- Experience working in a collaborative team, developers for implementation of design and with product management and engineering teams in an Agile / Scrum environment.
- Experience creating prototypes and highly detailed wireframes for complex web applications.
- Comfortable with modern UX design tools (e.g. Adobe Creative Suite, Omnigraffle, Sketch, Axure, Balsamiq).
- Experience building web-based products with ability to prototype in HTML, JavaScript, & CSS
- Demonstrated history of acquiring user data (Conducting usability studies and user research).
- Self-starter with excellent time management skills and ability to work without direct supervision.
- Fluency in best practices for information architecture and interaction design, user centered design process; strong knowledge of user experience principles and techniques.
- Familiarity with user interface patterns for web and mobile.
- With good communication skills with the ability to present a strong rationale for design decisions.
- With strong user advocacy – willingness to defend user interests at each step of project development.

### What You Can Expect from Us:

- **Significant career growth opportunities** in a fast-growing business
- **Competitive compensation** package
- Opportunities for **international travel**.
- **Challenging and diverse assignments**
- **Fun & casual working environment** in an international team.
